DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7-10 are rejected under 35 U.S.C. 102b as being anticipated by Ben-Haim US 5,480,422. Ben-Haim discloses (abstract, entire document) a system and method for treatment of cardiac arrhythmias comprising obtaining with a probe local physiological information of an internal body site and superimposing a map of that information on a perspective image of the region of interest.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 6 and 11-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ben-Haim in view of Wilk US 5,217,003 (disclosed by the applicant). Ben-Haim discloses a system and method for superimposing a map of local physiological information on a perspective image as recited in claims 1 and 11. Ben-Haim does not teach a tele-robotic system and computer controlled instrument positioning. Wilk teaches (abstract, Fig. 1) a surgical system and method comprising obtaining images of an internal body site of a patient with a probe, transmitting these signals to a remote site and controlling a robotic actuator mechanism to operate a surgical instrument insertable in the patient's body. It would have been obvious to someone of ordinary skill in the art at the time of the invention that the tele-robotic system of Wilk can be used to perform the image acquisition and physiological data acquisition and mapping of Ben-Haim.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Halmann et al. US 5,151,856 teach a system and method for superimposing on a visual image of an internal body organ a functional map of that organ.
